EXPERIENCE

DevOps Associate Engineer, AAA AUTO CLUB ENTERPRISES Jun 2025 - Present

- Contributing to modernization of mainframe systems to cloud-based solutions using Salesforce and AWS.
- Led Angular migration for an employee membership discounts app, improving maintainability & user experience.
- Maintaining and developing APIs querying IBM DB2 or Salesforce utilizing MuleSoft Anypoint Platform.
- Developed SQL stored procedures, integrating them into .NET APIs and workflows for file-creation services.
- Leading research in AI Agentic solutions such as Copilot Studios to enhance team workflow and productivity.

Software Developer III, PAYCOM Dec 2024 - Jun 2025

- Contributed to the automation of existing time & attendance payroll processes to decrease manual intervention.
- Developed React pages to track and export history of payroll changes and implementing end-to-end testing.
- Enhanced long-running reports using generators, increasing memory capacity from 200MB to 2GB.
- Trained newer developers in the team's workflow and tech stack; included heavy documentation and KT sessions.

Software Engineer II, WALMART GLOBAL TECH Feb 2024 - Aug 2024

- Led as SME for a legacy CI/CD tool supporting apps and Helm charts for over 6,000 stores, hosted on Kubernetes.
- Provided biweekly 24-hour support for applications using tools such as Kafka, Kubernetes, and Linux.
- Automated the Change Request process for a legacy CI/CD app which reduced manual steps by 10%.

Software Developer Team Lead, RONNIE K. IRANI CENTER (I-CCEW) Aug 2023 - Dec 2023

- Directed a team in developing an AI/ML-based excipient selection tool for pharmaceutical use cases.
- Led database design, algorithm development, and early-stage results analysis for the system.
- Mentored team members in Agile methodologies and how to properly use AI tools to their benefit.
- Maintained direct relations with the client to ensure progress was proceeding as intended and results were delivered.

Software Engineer II Intern, WALMART GLOBAL TECH May 2023 - Aug 2023

- Collaborated with the product team to field test the new receipt check application and document any bugs.
- Spearheaded the development of a Java Spring Boot backend service to automate deployment processes.
- Worked with Microsoft App Center and Sauce Labs APIs to build automation and cross-platform testing.
- Enhanced CI/CD pipelines, reducing manual oversight and accelerating deployment processes.

Undergraduate Research Assistant, UNIVERSITY OF OKLAHOMA Aug 2022 – Dec 2023

- Researched the application of HPC techniques to optimize the performance of ML algorithms.
- Examined the reduction process in convolution operations to identify various methods for optimization.
- Converted the reduction operation to broadcasting and built upon this with multiple variants of the program.
- Developed a Python code generator to automate testing and aid in identifying more performance enhancements.
- The optimized stencil code achieved a 7.4x speedup (0.62 to 4.59 GFLOPs/s) on the same hardware.
- Aided my professor in kick-starting a more accessible undergraduate research program at my university.

EDUCATION

University of Oklahoma, Norman, OK Dec 2023

Bachelors of Science in Computer Science GPA: 4.00

- Certificates: Minor in Mathematics and Engineering Leadership
- Awards: Hacklahoma 2023 Best Theme and Best Use of MongoDB, Dean's and President's Honor Roll

SKILLS

-
- **Languages & Core Frameworks:** C, C#, C++, Python, GoLang, Java, PHP, .NET, Angular, React, Spring
 - **Data & Infrastructure:** Data Management, Oracle, SQL, DevOps, Kubernetes, Linux, Maven
 - **Advanced & Enterprise Systems:** AI/ML, HPC, COBOL, MuleSoft, Salesforce, GitHub/GitLab
