EXPERIENCE

DevOps Associate Engineer, AAA AUTO CLUB ENTERPRISES

Jun 2025 - Present

- Collaborating with product and design to modernize mainframe systems to the cloud using Salesforce and AWS.
- Led design and testing of an Angular migration project resulting in a more optimized and maintainable platform.
- Maintaining and designing REST APIs for legacy and modern systems using Postman, Mulesoft, and Anypoint.
- Developed SQL procedures, .NET APIs, and workflows to optimize performance of legacy finance systems.
- Continuously learning new tech stacks and work processes on the fly to aid different teams in high-priority projects.
- Participate in on-call rotations that involve going through logs, testing, and implementing database fixes with SQL.

Software Developer III, PAYCOM

Dec 2024 - Jun 2025

- Helped automate existing time & attendance finance processes to decrease manual intervention using React.
- Communicated with Product to ensure design requirements were being met and functionalities were compliant.
- Enhanced long-running reports PHP programs using generators, increasing memory capacity from 200MB to 2GB.
- Trained newer developers in the team's workflow and tech stack; included heavy documentation and KT sessions.

Software Engineer II, WALMART GLOBAL TECH

Feb 2024 - Aug 2024

- Led as SME for a legacy CI/CD tool supporting apps and Helm charts for over 6,000 stores, hosted on Kubernetes.
- Provided biweekly 24-hour support for production deployments using tools such as Kafka, Kubernetes, and Linux.
- Automated the Change Request process for a legacy CI/CD app which reduced manual steps by 10%.

Software Developer Team Lead, RONNIE K. IRANI CENTER (I-CCEW)

Aug 2023 - Dec 2023

- Directed a team in developing an AI/ML-based excipient selection tool to automate pharmaceutical use cases.
- Led devs in making automated Python programs to parse through and grab relevant info from large data sets.
- Mentored team members in Agile methodologies and how to properly use AI tools to their benefit.

Software Engineer II Intern, WALMART GLOBAL TECH

May 2023 - Aug 2023

- Collaborated with Product to field test a receipt check app and document bugs or potential areas for improvement.
- Developed a Java Spring Boot backend service to automate deployment processes accelerating it by 11%.
- Worked with Microsoft App Center and Sauce Labs APIs to build automation and cross-platform testing.
- Implemented thorough logging and metric tracking to allow for easy maintenance of my service after the internship.

Undergraduate Research Assistant, UNIVERSITY OF OKLAHOMA

Aug 2022 - Dec 2023

- Applied high performance convolution techniques in C to optimize stencil computations achieving a 7.4x speedup.
- Taking latency and throughput into account, reduction was converted to broadcasting as a base optimization.
- Implemented methods like pipelining, unrolling, and interleaving to further accelerate performance.
- Developed a Python code generator to automate testing and aid in analyzing results through distribution graphs.

PROJECTS

Padawan Academy

<https://www.devpost.com/software/padawan-academy>

- Educational AI chat bot developed with Swift winning Best Theme and Use of MongoDB during Hacklahoma 2023.

EDUCATION

University of Oklahoma, Norman, OK

Aug 2020 - Dec 2023

Bachelors of Science in Computer Science

GPA: 4.00

Certificates: Minor in Mathematics, Engineering Leadership, Dean's and President's Honor Roll

SKILLS

- **Languages & Core Frameworks:** C, C#, C++, Python, Go, Java, PHP, .NET, Angular, React, Spring, JS/TS
- **Data & Infrastructure:** Data Management, Oracle, SQL, DevOps, Kubernetes, Linux, Maven
- **Advanced & Enterprise Systems:** AI/ML, HPC, COBOL, MuleSoft, Salesforce, GitHub/GitLab
