EXPERIENCE

Software Engineer, AAA AUTO CLUB ENTERPRISES Jun 2025 - Present

- Partnered with product and design to modernize mainframe systems to cloud platforms (AWS, Salesforce).
- Led design and development of an ASP.NET-to-Angular migration, optimizing UI performance and maintainability.
- Developed and maintained REST APIs for legacy and modern systems using Postman and Mulesoft.
- Automated finance workflows with SQL and .NET, reducing manual errors and improving processing efficiency.
- Building automated test suites with Tosca, reducing redundant workflows and accelerating deployment cycles.
- Participate in on-call rotations, diagnosing and resolving production issues and implementing fixes.

Software Developer III, PAYCOM Dec 2024 - Jun 2025

- Built React/TypeScript components to automate payroll processes, reducing manual work and improving efficiency.
- Developed React pages for tracking and exporting payroll change history, also implementing end-to-end testing.
- Optimized long-running PHP financial reports using generators, increasing memory capacity from 200MB to 2GB.
- Trained new devs in the team's workflow and tech stack through documentation and knowledge transfer sessions.

Software Engineer II, WALMART GLOBAL TECH Feb 2024 - Aug 2024

- Led as SME for a legacy CI/CD tool supporting Kubernetes-based apps and Helm charts for over 6,000 stores.
- Provided biweekly 24-hour production support for deployments using tools such as Kafka, Kubernetes, and Linux.
- Automated the Change Request process for a legacy CI/CD app which reduced manual steps by 10%.

Software Developer Team Lead, RONNIE K. IRANI CENTER (I-CCEW) Aug 2023 - Dec 2023

- Directed a team of developers in creating an AI/ML-based excipient selection tool for pharmaceutical automation.
- Led developers in building automated Python scripts to parse and extract relevant data from large datasets.
- Mentored team members in Agile methodologies and how to properly integrate AI tools into their workflow.

Software Engineer II Intern, WALMART GLOBAL TECH May 2023 - Aug 2023

- Collaborated with Product to field test a receipt check app and document bugs or potential areas for improvement.
- Developed a Java Spring Boot backend service to automate deployment processes accelerating it by 11%.
- Worked with Microsoft App Center and Sauce Labs APIs to build automation and cross-platform testing.
- Implemented logging and metric tracking to allow for easy maintenance of the backend service post-internship.

Undergraduate Research Assistant, UNIVERSITY OF OKLAHOMA Aug 2022 – Dec 2023

- Applied high performance convolution techniques in C to optimize stencil computations achieving a 7.4x speedup.
- Reduced latency and improved throughput by converting reductions to broadcasting as a base optimization.
- Implemented additional methods like pipelining, unrolling, and interleaving to further accelerate performance.
- Developed a Python code generator to automate testing and aid in analyzing results through distribution graphs.

PROJECTS

Padawan Academy <https://www.devpost.com/software/padawan-academy>

- Educational AI chat bot developed with Swift winning Best Theme and Use of MongoDB during Hacklahoma 2023.

EDUCATION

University of Oklahoma, Norman, OK Aug 2020 - Dec 2023

Bachelors of Science in Computer Science GPA: 4.00

Certificates: Minor in Mathematics, Engineering Leadership, Dean's and President's Honor Roll

SKILLS

-
- **Languages & Core Frameworks:** C, C#, C++, Python, Go, Java, PHP, .NET, Angular, React, Spring, JS/TS
 - **Data & Infrastructure:** Data Management, Oracle, SQL, DevOps, Kubernetes, Linux, Maven, AWS
 - **Advanced & Enterprise Systems:** AI/ML, HPC, COBOL, MuleSoft, Salesforce, GitHub/GitLab
